Portfolio

Professional Summary

Professional Flutter Developer with nearly 2 years of experience building high-quality cross-platform mobile applications for Android and iOS using Dart and Flutter. Experienced in responsive UI development, REST API integration, and Firebase services (Authentication, Firestore, FCM). Strong understanding of clean architecture, performance optimization, and full-cycle app deployment on Google Play Store and Apple App Store. Focused on developing scalable, reliable, and user-centric mobile solutions aligned with business goals.

Experience

Flutter Developer @ Softvence Agency

April 2025 – Present

- Developed and maintained 7+ cross-platform mobile applications for Android and iOS using Flutter
- Worked with UI/UX designers and backend engineers to deliver scalable, user-focused features
- Built and enhanced application features based on business requirements and product goals
- Integrated RESTful APIs for authentication, real-time data sync, and backend services
- Optimized app performance by improving UI rendering and reducing load time across devices
- Used Provider/GetX for state management and followed MVVM/MVC architecture for scalable structure
- Integrated Firebase push notifications for real-time user engagement
- Managed full app lifecycle including deployment and updates on Google Play Store and Apple App Store

Flutter Developer Internship @ Codecell Limited

October 2024 – March 2025

- Collaborated with the mobile app development team as a Flutter Developer Intern, gaining hands-on experience in building cross-platform applications using Flutter and Dart.
- Worked on responsive and user-friendly UI implementation, converting design concepts into functional mobile app screens while maintaining clean and reusable code practices.
- Learned and implemented basic REST API integration, including fetching and displaying dynamic data from backend services within Flutter applications.

Projects

StepAhead Health — Flutter • Dart • Firebase • REST API • Real-Time Chat • Stripe

- Built a cross-platform healthcare application using Flutter and Firebase for Android and iOS
- Developed core healthcare application features from scratch, including prescription handling, clinician review, medication management, and pharmacy workflows.
- Integrated RESTful APIs with real-time chat for secure patient-clinician communication
- Ensured secure data handling and enhanced app performance for reliable user experience
- Published on [Google Play Store](#) and [Apple App Store](#)

Fabricz — Flutter • Dart • REST API • Firebase • Stripe

- Developed and deployed a full-stack e-commerce mobile application from scratch for a fashion brand, managing the entire development lifecycle including UI design, development, testing, and production release.
- Built the application using Flutter with REST API integration, Firebase services, and Stripe payment gateway for secure online transactions
- Implemented core e-commerce functionalities including product browsing, authentication, cart management, and order processing with a clean and responsive UI
- Added a Guest Mode feature that allows users to explore products without authentication, improving accessibility and user engagement
- Published on [Google Play Store](#) and [Apple App Store](#)

Random Habit — Flutter • Dart • Firebase • REST API • Stripe

- Random Habit application to help users track and develop habits
- Implemented push notifications with custom sound and timezone-based scheduling
- Integrated Stripe payment gateway with promo code support
- Developed user engagement features including Lottie animations and reward-based completion system
- Published on [Google Play Store](#) and [Apple App Store](#)

CR Tec — Flutter • Dart • Real-Time Chat • Stripe • Location Tracking

- Developed CR Tec, a smart vehicle service management application for a Saudi Arabian client, designed to connect users with nearby car workshops during emergency vehicle breakdown situations.
- Implemented location-based workshop search and service request functionality, enabling users to quickly find and contact nearby workshops for car repair assistance.
- Built a real-time communication system where users and workshops can chat directly throughout the repair process, including repair updates and parts replacement approvals.
- Integrated Stripe payment gateway for secure in-app payments, allowing users to complete service payments digitally before collecting their repaired vehicle.
- Published on [Apple App Store](#)

Unpuff — Flutter • Dart • REST API • Firebase • RevenueCat • AI Chat • Community Features

- Built a smoking cessation mobile application from scratch with AI-powered chat assistance, wellness exercises
- Developed community engagement features where users can create posts, interact through likes and comments, and stay motivated during their quit journey
- Integrated RESTful APIs and Firebase services to ensure smooth real-time communication and scalable performance
- Designed responsive and user-friendly interfaces to improve accessibility and overall user experience
- Published on [Google Play Store](#) and [Apple App Store](#)

Lyvi — Flutter • Dart • Real-Time Chat • LinkedIn Verification

- Built a roommate-finding app for students and recent graduates in the USA.
- Implemented real-time chat, follow/unfollow, and block features to enhance user interaction and safety.
- Integrated LinkedIn verification for non-student users to ensure profile authenticity.
- Published on [Google Play Store](#) and [Apple App Store](#)

LoveWell Parenting App — Flutter • Dart • REST API • Firebase • RevenueCat Subscription

- Developed a parenting application with task management, rules, rewards, and responsibilities for parent-child collaboration.
- Integrated REST APIs, Firebase, and RevenueCat subscriptions to deliver a seamless and scalable user experience.
- Designed responsive and user-friendly interfaces to improve usability and overall user experience.
- Published on [Google Play Store](#) and [Apple App Store](#)

Open Source Contributions

Validator Kit — Flutter • Dart

- Published a reusable Flutter package for form validation with clean and reusable validation utilities.
- Available on pub.dev/packages/validator_kit

Technical Skills

Languages: Dart, Java, C

Frameworks: Flutter

Backend & APIs: REST API, Firebase

Tools: Android Studio, VS Code, Git, GitHub

Services: Firebase Auth, Firestore, Stripe, RevenueCat

Architecture: Clean Architecture, OOP, State Management

Education

Daffodil International University

BSc in Computer Science & Engineering

CGPA: 3.53 / 4.00 — 2020 – 2024

Dhaka City College

Higher Secondary Certificate

GPA: 5.00 / 5.00 — 2016 – 2018

Thakurgaon Government Boys' High School

Secondary School Certificate

GPA: 5.00 / 5.00 — 2010 – 2016
